

PC-*

Power Cable Assembly

BENEFITS

- Low Cost
- Totally Flexibility
- Easy set up
- Simple integration

The Tech Works PC-* ("*" specify Length) is a Power Patch Cable designed to connect our Tech Works Collaborative Intercom (CI-Buss) and PA-Buss products together. These units are designed for the systems integrator to make installation Plug and Play.

18 gauge power cord is made with 5.5 mm barrel connectors on each end for connecting 24 VDC power from one unit to the next. Quality molded 5.5 mm barrel end connectors make installation and reliable service both simple and performance predictable.

Our Patch Cables are stocked in 1 foot (PC-1), 3 foot (PC-3), 10 foot (PC-10), 25 foot (PC-25), 50 foot (PC-50), and 100 foot (PC-100) lengths.

Associated Equipment

CI-ODC-1	Operator Desk Console
CI-HSI-41	Headset Interface
CI-MSI-22	Mic / Speaker Interface
PA-402	Paging Amplifier
PA-SI-1	Speaker Interface 1-Watt Amplifier
IC-52B	Intercom Amplifier
2528B	Intercom Amplifier and Control Module
2508B	Data Collection/Control Module

Design Information

Construction	18-gauge copper conductors 5.5 mm barrel cable connector Integral strain relief
Dimensions	0.5" W x * = specify Length

Architects' and Engineers' Specifications

Audio System Power Cables must be provided for interface of the Intercom from one module to the next. The Power Cables must be 18 gauge conductors with 5.5 mm barrel connectors and integral strain relief.

The Power Cables shall be Tech Works Model PC-* ("*" specify Length).
