

MJ-1

Microphone Jack Assembly

BENEFITS

- Easy to Install
- Unobtrusive
- Durable Construction
- Professional Quality

The Tech Works MJ-1 Microphone Jack is a complete assembly for easy installation without the need for a soldering iron. A 3 pin XLR style connector is provided on a white plastic Deco electrical plate. The XLR connector is pre-wired to a 6-inch length of twisted pair, shielded cable with stripped and tinned ends. All the installer needs is a professional crimp tool to attach the MJ-1 to the field cable. A standard 1-Gang Nylon trim plate is included.

Wiring is a standard twisted, shielded audio pair cable for connection by splice caps.

This product is specifically designed and manufactured for use with the IC-52 and CI-MSI-22 Intercom Amplifiers.

Design Information

Connection	3-Pin Female XLR
Color	White
Mounting	1 Gang Back Box
Dimensions	3.125" W x 4.875" H x 1" D
