

## PMI-C

### Portable Music Interface Bluetooth

#### BENEFITS

- Compatible with Bluetooth-Enabled Devices
- Wireless
- Wi-Fi Enabled
- 33' Wireless Range
- Effortlessly Add Music

The Tech Works PMI-C is a Bluetooth-enabled wireless portable music interface for playing customer provided music from their personal music device into controlled environment (clean room) applications. This device allows staff to pair their own personal Bluetooth-enabled device with a PA-402; this allows their own music to be played through the Tech Works intercom system. This affordable, wireless option makes it faster and easier than ever for staff to play their own music while working in controlled environments.

To Pair your device simply push the big round button in the middle of the PMI-C and scan for "B06+" on your device.

An AC/DC power adapter, a 3.5mm-to 3.5mm, and a 3.5mm-to -RCA stereo audio plug adapter are included.
