

WM-1 Single Unit Rack Mount

WM-2 Dual Unit Rack Mount

The Tech Works WM-1 and WM-2 Wall Mounting Kits are designed for use with our 1 rack unit high by half rack unit wide products. These are metal components with powder coat paint for use in mounting our products to backboards or under-counters.

The WM-1 includes two angle brackets and 4 mounting screws to attach the brackets to our DM (Desk Mount) packages.

The WM-2 includes two angle brackets and double wide metal top and mounting screws. To install the WM-2 you simply remove the Desk Mount tops of the two units to be mounted and place them side by side on the bench. Place the doublewide top on the two units and replace the screws. Then using the screws that come with the kit you attach the angle brackets to the outside of the package. Remove the back labels from the original Desk Mount tops and place them on the back of the completed unit.

WM-1 and WM-2

Wall or Under-Counter Mounting Kits
