

## Application Guide Rest Room Emergency Call

### Benefits

- UL-1069/ADA compliant
- Scalable from 1 to 256 locations
- Integrate for messaging and reporting
- Increase staff efficiency
- Simple to install, use, and support
- Customizable notifications
- 36-month limited warranty
- Engineered and Built in the USA

Many Public Rest Rooms require an Emergency Pull Station today. Tech Works NC-Series is UL1069 listed for all Nurse Call and emergency signaling. Systems as small as one station with one Dome Light are very easy with Tech Works NC.

The Dome Light can be the controller so that all you need is a Dome Light, a Power Supply, and a Pull Station. If secondary alarm notification is required at a staff location, just add a secondary Dome Light. All of our single-color dome lights are available with or without built in audio tone to draw attention to the emergency.

For larger applications with multiple stalls or toilets, each Dome Light can support up to 8 NC-EPS Emergency Pull Stations. This allows a single Dome Light outside of a rest room to support up to 8 Pull Stations in 8 stalls in a single location. When there are multiple rest rooms to be covered, a control module and multiple annunciator locations can be added as needed. This allows staff to respond quickly to emergency calls from multiple areas.

### Features

<b>Modular</b>	Enables a facility to design a system custom-tailored to their specific needs
<b>Fully Integrated</b>	Uses Tech Works unified technology and operates over any standard medium
<b>Flexible</b>	Designed to handle all of a clinic's operational communication needs
<b>ADA Compliant</b>	Call switches feature visual call acknowledgement
