Only NC-Series by Tech Works provides a comprehensive, integrated solution for Convalescent and Assisted Living environments that enables nurses and other caregivers to respond to patient needs with such freedom and efficiency.

Tech Works provides a flexible system that can be easily installed and afford-ably modified or expanded.

Choose the component solutions that are most appropriate for your patients' needs Attach an IMR, and the system sends Text Messages and Records every patient call with time and date

Modular components allow you to combine all of these options into a single, customizable system that can grow and change to fit your needs. This intelligent, programmable system ensures responsive patient care.
